

We have been advised last X factory LWB 4x4 cab chassis have been allocated. EarthCruiser has access to the few remaining SWB Fuso dual range 4x4's. We are negotiating to have SWB units wheel base extended case by case.

While we are eagerly awaiting the new 3litre engine for the AWD (LWB-SWB & Dual cab), it is important to keep in mind the new engines will not be compatible with low sulfur diesel fuel. Common in many developing countries our customers wish to explore.

For more information please call or email us.
