

Welcome to the November EarthCruiser Overland Vehicle's Newsletter.

**Welcome to new members of the EarthCruiser Team**  
**Michelle Boltz, Overland Travel Specialist.**

Travel is in Michelle's genes, from trekking around the globe at five years old (Michelle's dad was an airline pilot) to extensive overseas living, Michelle brings a wealth of passion and overlanding experience to Earth Cruiser customers.

**Michael Gregson, Production and Quality Manager.**

Michael and a few mates designed and built a 4x4 overland machine for a boys own adventure 25 years ago to travel through some of the most amazing parts of Australia's out back. Michael is a keen and very experienced four wheel drive and camping enthusiast. Michael's commitment to delivering a quality product and customer service is what the EarthCruiser philosophy is all about.

EarthCruiser clients spend the day with Michael at EarthCruiser's own test track when taking delivery of their new vehicle. We leave no stone unturned, when you're happy, we're happy.

**EarthCruiser UTE** program is progressing very well. The first dual cab will be delivered in the next few weeks, which will complete our range of fully compliant off the shelf vehicles. With their astonishing off road credentials and ride quality, the EarthCruiser UTE range is becoming very popular for "slide on type campers" and tradies.

We caught up with **Michael and Sarah** who have just arrived in Portland Oregon in the USA in their EarthCruiser after stopping off in Malaysia, Thailand, Cambodia, China, Tibet, Mongolia and Russia. They're some very happy customers. Congratulations to them for living the dream.

We are very pleased with our new **Long Wheel Base EXP**, and so are new owners! With orders and sales from, Egypt, Switzerland and Australia, the **New LWB Hard side is now available** with more space and storage. Note though it doesn't fit in a 20ft container. EarthCruiser is establishing a base in Nth America and we're taking orders for LWB units. We have limited capacity left for 2011-2012.
